GTM Strategy

Spotify Mingle- A fundamental feature for boosting the app's social presence and longevity. By fostering deeper engagement with friends and acquaintances, sharing songs becomes an emotional experience. This positions Spotify well ahead of new market entrants, laying the foundation for future social feature innovations. It comes as a 'must-have' addition.

Green Snap- Daily snap sharing on the platform will evolve into an emotional ritual, especially for our primary Gen Z audience. It's all about conveying feelings through visuals and songs, fostering unique preferences and emotions

Nostalgia Track- While sharing playlists and memories is appealing, it necessitates a distinct strategy from development to launch, positioning it as a lower priority compared to features that enhance real-time interaction and personalization

Brand Positioning

- Positioning social feature as a part of listening Experience
- Should pitch us a Tempting feature

Marketing & Sales

Initially, the focus should be on Spotify Mingle, as it will serve as the foundation for other features.

Target Market

Emphasizing Gen Z, tailor social features to their preferences, as these functionalities particularly appeal to them.

Timing

Consider launching on Youth Day, initiating the campaign within universities
